DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 28-43, 48-51, drawn to a booth powder spraying system, classified in class 118, subclass 309.
 - II. Claims 15-24, drawn to a powder recovery system, classified in class 239, subclass 693.
 - III. Claims 25-27, drawn to a vacuum receiver, classified in class 118, subclass 312.
 - IV. Claims 44-47, drawn to a quick-change powder coating system, classified in class 118, subclass 309.
 - V. Claims 52-54, 63, 64, drawn to powder coating system with a recovery system, classified in class 239, subclass 693.
 - VI. Claim 55, drawn to a method of cleaning a vacuum line in a powder recovery system, classified in class 118, subclass 312.
 - VII. Claims 56-61, drawn to powder coating system, classified in class 118, subclass 308.
 - VIII. Claim 62, drawn to a powder over spray sieve, classified in class 118, subclass 312.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II, III, IV, V, VI, VII, and VIII are related as subcombinations disclosed as usable together in a single combination. The

subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as a powder coating system with a powder feed apparatus; invention Group II has separate utility such as a powder coating system with a cyclone separator; invention Group III has separate utility such as a vacuum receiver for a powder recycle system, invention Group IV has separate utility such as a powder coating system with a circular booth, invention Group V has separate utility such as a powder coating system with a vacuum recovery system, invention Group VI has separate utility such as a method for cleaning a vacuum line for a powder recovery system, invention Group VII has separate utility such as a powder coating system with a powder pump, invention Group VIII has separate utility such as a powder over spray sieve for a powder coating system. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Douglas McKnight on February 05, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q Nguyen whose telephone number is (703) 305-0248. The examiner can normally be reached on Monday-Friday from 6:30 AM to 4:00 PM.
